Digital Hampshire (UK) Strategy

Digital inclusion

Providing choice through access to support, technology and services to help everyone maximise life opportunities in a digital world

“Helping everyone in Hampshire to benefit from the digital age”

Modern public services

Working with partners across public, business, voluntary and charity sectors to develop more efficient, simpler, faster and joined-up electronic services, designed around the customer

Hampshire's economy

Encouraging the development of an effective digital infrastructure and promoting Hampshire as a place to do business

Our Shared Digital Principles

Helping everyone join in

Designing accessible digital services and improving broadband access to ensure that as many people as possible can take advantage of those services

Supporting business growth

Working together to maximise the opportunities of digital services in Hampshire for businesses large and small, and so encouraging inward investment and lower carbon footprint

Customer in control

Ensuring in the way information and services are made available that the customer is always in control, maximising transparency and self-service where possible

Digital by default

Accelerating the move to a 'digital only' delivery where possible, reflecting the needs of different groups and allowing for choice while balancing efficiency with service quality

Public services together

Ensuring the public services work together to share insight, technology and services, making services more efficient for the taxpayer and more joined up for the service user

Conclusion – Change Needed

... always true ... but much more, much quicker:

- IT model in public sector
- Procurement, contracts and shared services
- Role of technology in modern society
